

THARAKA PRABASH LAKPRIYA

Software Engineer Intern | Full-Stack Developer

Kelaniya, Sri Lanka | 0716043275 | prabashtharaka87@gmail.com

GitHub: github.com/thrakaprabash | LinkedIn: linkedin.com/in/tharaka-prabash | Portfolio: tharakaprabashlakpriya.netlify.app

PROFESSIONAL SUMMARY

Third-year Information Technology undergraduate at SLIIT specializing in Software Engineering, with hands-on full-stack development experience across React, Next.js, Node.js, Express.js, and MongoDB. Proficient in JavaScript, TypeScript, Python, Kotlin, and Spring Boot, with practical exposure to databases, Docker, and software quality assurance practices. Passionate about clean code architecture and scalable system design, seeking a Software Engineering internship to contribute to a development team.

TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, Python, Kotlin, Java, HTML, CSS
- Frontend Development: React 19, Next.js, Vite, Tailwind CSS, React Router, Recharts
- Backend & Databases: Node.js, Express.js v5, MongoDB, Mongoose, MySQL, JWT, REST API Design, Spring Boot
- Mobile Development: Kotlin, Jetpack Compose, Material 3, MVVM Architecture, Room Database, React Native, Expo
- Cloud & Payments: MongoDB Atlas, Stripe, Vercel, Netlify, Docker, Kubernetes
- Testing & QA: Cypress E2E, Playwright, Selenium, BDD Frameworks, API Testing, UI Testing, Defect Logging
- Security: Helmet, Rate Limiting, bcrypt, Input Validation (Joi, Express Validator)
- Developer Tools: Git, GitHub, CI/CD Pipelines, ESLint, Nodemon, dotenv

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT), Malabe

2023 - Present

BSc (Hons) in Information Technology, Specialization in Software Engineering

- Relevant Coursework: Object-Oriented Programming, Software Engineering and Quality Management, Application Frameworks, Mobile Application Development

GCE, Advanced Level (Physical Science Stream)

2023

- Combined Mathematics C
- Physics C
- Chemistry S

GCE, Ordinary Level A6 B3

2018

CERTIFICATIONS

- MongoDB Node.js Developer Path — MongoDB, June 2026 (Credential ID: MDBIfvy8rpj9x)
- Certificate Course in Computer Applications — Institute of Human Resource Advancement, University of Colombo, December 2023 (Credential ID: CCCA3127)
- Certificate Course in English Language — Institute of Human Resource Advancement, University of Colombo, December 2023 (Credential ID: IL-21330)
- Database for developers: Foundations | Oracle | Oracle SQL Developer

PROJECTS

Healio — Smart Healthcare Platform (Microservices)

2026

- Architected and delivered a cloud-native healthcare platform using **React 19**, **Node.js/Express**, and **MongoDB Atlas** with a microservices architecture.
- Containerized services with **Docker** and orchestrated deployments on **Kubernetes**, enabling scalable, fault-tolerant service management.
- Implemented event-driven communication with **RabbitMQ** and performance optimization via **Redis** caching for low-latency access to frequent data.
- Built secure **JWT**-based authentication/authorization and integrated **Stripe** for payment workflows.
- Integrated **Cloudinary** for medical/media asset management, **Gemini API** for AI-assisted features, and **Jitsi Meet** for real-time teleconsultation sessions.
- Improved maintainability and independent service deployment through clear service boundaries and **API** contracts.

Sliitgram — Student Mental Health & Social Community Platform

2026

- Developed a full-stack community platform using **React 19 + Vite**, **Node.js/Express**, and **MongoDB** focused on student engagement and wellness support.
- Implemented secure **JWT authentication**, **Cloudinary-based image pipeline**, and **Nodemailer notifications** for user activity and communication flows.
- Deployed frontend/backend with **Vercel** and configured **CI/CD automation** for faster, reliable releases.
- Designed modular components and **REST APIs** to support social interactions, scalable feature additions, and maintainable code structure.

QR Code Generator

2026

- Built a full-stack QR platform with **React 18 + Vite + Axios** frontend and **Spring Boot 3.2 + Spring Data JPA + MySQL** backend.
- Implemented QR generation and processing using **Google ZXing**, with API-driven workflows between client and server.
- Structured backend into layered architecture (controller/service/repository) to improve testability and maintainability.

Focus Tree — Android Productivity Application

2025

- Developed a native Android productivity app using **Kotlin**, **Jetpack Compose**, and **Material 3**.
- Applied **MVVM architecture**, **Room Database** for local persistence, and **StateFlow** for reactive UI state management.
- Built clean, lifecycle-aware UI/data flow to improve responsiveness and long-term maintainability.

Focus Tree App — Gamified Focus & Task Manager

2026

- Built a cross-platform mobile productivity app with **React Native**, **Expo**, **React Navigation**, and **AsyncStorage**.
- Designed gamified task/focus flows and implemented **Expo Notifications** for reminders and habit reinforcement.
- Delivered a shared codebase for Android/iOS, reducing development overhead and speeding feature iteration.

BoardMate — Collaboration & Project Management Platform

2025

- Engineered a team collaboration platform using **React**, **Vite**, **Tailwind CSS**, **Node.js**, and **Express.js**.
- Developed task/project management modules with reusable UI components and **RESTful** backend services.
- Focused on clean UX, modular architecture, and maintainable full-stack integration.

Toolsyne — Online Tool Hub and Utility Suite

2024

- Created and deployed a collection of browser-based utilities using **React**, **Vite**, and **Tailwind CSS** on **Netlify**.

- Built reusable frontend patterns and optimized lightweight tools for accessibility and fast user interactions.

E-Commerce Platform

2024

- Developed a full-stack commerce application using **Node.js**, **Express.js**, **React**, and **MongoDB**.
 - Implemented core flows: product catalog, cart management, and transaction handling with API-driven frontend/backend integration.
 - Structured application modules for scalability and easier feature extension.
-

KEY ACHIEVEMENTS

- Successfully deployed multiple full-stack applications on Vercel and Netlify with automated CI/CD pipelines
- Maintain an active GitHub profile with 20+ repositories spanning the MERN stack, Android development, and full-stack projects
